## Merchant Registration

Items	Description
<b>Merchant Name</b>	The name of merchant.
<b>Payment channels</b>	List of payment channels will be used.
<b>NotiURL / Callback URL</b>	Merchant's prepared URL that will be used to receive payment status notification from GOC Pay.
<b>Server IPs</b>	List of merchant server IPs that will access GOC Pay API.

## GOC Pay Overview

1. After user checkout his purchase transaction at Merchant which also confirming the amount to be paid, Merchant submit **Payment Request** to GOC Pay.
2. GOC Pay will make new transaction according to Merchant's Payment Request and make payment order on behalf of GOC to be proceed for payment process at Payment Channel.
3. Depend on payment method the process flow of each Payment Channel will be different. After payment process at Payment Channel is finished the result of GOC Pay payment order will be sent to GOC Pay.
4. GOC Pay receives payment result from Payment Channel and process it accordingly and then sent **payment notification** message of payment result to Merchant.
5. Merchant then process the corresponding user transaction according to payment result received from GOC Pay.
6. If Merchant for some cause does not receive payment result notification or just need to check the pending payment status, Merchant may initiate **payment status inquiry** to get the payment status information.
7. GOC Pay will response with payment status information, whether it is paid, waiting for user payment or invalid payment request.
8. Merchant receives payment status and process accordingly.

## Payment Request

### [Merchant] → [GOC Pay]

After customer checkout and confirm his transaction, merchant redirect forwards the customer and payment request data to GOC Pay website with following parameters:

Payment Request			
URL	https://pay.goc.id/		
HTTP method	POST		
Content-Type	x-www-form-urlencoded		
Parameters			
Name	Type	Required	Description
merchantId	an	Yes	Merchant ID, provided by GOC. <b>Required:</b> Yes <b>Format:</b> 10 characters
trxId	an	Yes	Merchant transaction ID, a unique value to identify each transaction. <b>Required:</b> Yes <b>Format:</b> max 64 characters
trxDateTime	ns	Yes	Merchant transaction date and time, payment request with trxDateTime older than 24 hour will be rejected. <b>Required:</b> Yes <b>Format:</b> yyyy-MM-dd HH:mm:ss for WIB time zone or follow ISO 8601 for WIB and other time zones Example: "2017-01-22 13:05:00" or "2017-01-22T13:05:00+07"
channelId	n	Yes	Payment channel ID. <b>Required:</b> Yes <b>Format:</b> numeric, see payment channel id list
amount	n	Yes	Total transaction amount that should be paid by customer. <b>Required:</b> Yes <b>Format:</b> numeric, integer for currency IDR besides IDR currency, thousand comma separators should be removed before assign value to this parameter, for the amount beside IDR currency parameter multiplied by 100. example : currency : THB 1.55 x 100 = 155. 155 input into the parameter amount.
currency	a	Conditional	Transaction currency. <b>Required:</b> Conditional, optional for IDR, required for other currencies

			<b>Format:</b> ISO 4217 currency code
returnUrl	ans	Yes	Merchant return URL, for redirecting back customer to merchant's site after payment process. Recommended to include unique identifier for transaction in the URL. <b>Required:</b> Yes <b>Format:</b> URL, max 255 characters
name	an	Optional	Customer name. <b>Required:</b> Optional, for credit card and CIMB Clicks channel if not supplied customer will be asked to fill it on GOC Pay page <b>Format:</b> max 50 characters
email	ans	Optional	Customer email. <b>Required:</b> Optional, for credit card and CIMB Clicks channel if not supplied customer will be asked to fill it on GOC Pay page <b>Format:</b> max 100 characters
phone	n	Optional	Customer phone number. <b>Required:</b> Optional, for carrier billing and CIMB Clicks channel if not supplied customer will be asked to fill it on GOC Pay page <b>Format:</b> numeric
klikbcald	an	Optional	Customer KlikBCA UserID. <b>Required:</b> Optional, for KlikBCA channel if not supplied customer will be asked to fill it on GOC Pay page <b>Format:</b> 12 characters
userId	an	Conditional	Merchant's managed customer ID. <b>Required:</b> Conditional, required for Telco Carrier Billing payment channel <b>Format:</b> max 64 characters
sign	an	Yes	Message hash signature, formula: SHA256(merchantId + trxId + trxDateTime + channelId + amount + currency + hashKey) (*hashKey will be provided by GOC) <b>Required:</b> Yes <b>Format:</b> 64 characters

Note: This Payment Request will be expired in 24 hours if customer does not complete the payment.

## Payment Notification

### [GOCPay] → [Merchant]

When a Customer has completed the payment, GOCPay will notify Merchant the payment status information to Merchant NotiUrl.

Merchant must provide and register the notiURL in order to receive payment status update from GOCPay.

Payment Notification			
URL	Merchant NotiURL		
HTTP method	POST		
Content-Type	x-www-form-urlencoded		
Parameters			
Name	Type	Required	Description
status	n		Payment status code: 100, means the transaction has been successfully paid by customer. <b>Format:</b> numeric, integer
merchantId	an		Merchant ID, provided by GOC. <b>Format:</b> 10 characters
trxId	an		Merchant transaction ID, a unique value to identify each transaction. <b>Format:</b> max 64 characters
channelId	n		Payment channel ID. <b>Format:</b> numeric, see payment channel id list
amount	n		Total transaction amount that should be paid by customer. <b>Format:</b> numeric, integer for currency IDR
currency	a		Transaction currency. <b>Format:</b> ISO 4217 currency code
paidDate	ns		Payment transaction date. <b>Format:</b> yyyy-MM-dd HH:mm:ss with WIB time zone Example: "2017-01-22 13:05:00"
paidAmount	n		Total amount paid by customer. For the channel Game-on card paidAmount it will be filled with the game-on card value inputted by the user. <b>Format:</b> numeric, integer for currency IDR
paidCurrency	a		Currency paid by customer. <b>Format:</b> ISO 4217 currency code
referenceId	an		Unique reference id of this transaction from GOCPay <b>Format:</b> 32 characters
sign	an		Message hash signature, formula:

			SHA256(merchantId + trxId + channelId + amount + currency + status + paidDate + paidAmount + paidCurrency + referenceId + hashKey) (*hashKey will be provided by GOC) <b>Required:</b> Yes <b>Format:</b> 64 characters
<b>Payment Notification Response</b>			
http message body	a	Yes	Merchant has to response the Payment Notification with plain "OK" string (without double quote) within HTTP message body response. If GOCPay does not receive the "OK" response from Merchant then GOCPay will do Payment Notification Retry for max. 5 times in 1 hour time span. If Merchant also miss the Payment Notification Retry then Merchant has to do Payment Inquiry to get the payment status.

Note: If GOCPay does not receive the "OK" response from Merchant then GOCPay will do Payment Notification Retry for max. 5 times in 1-hour time span.  
If Merchant also miss the Payment Notification Retry then Merchant has to do Payment Inquiry to get the payment status.

## Payment Status Inquiry

[Merchant] → [GOC Pay]

Merchant may use this API to check the payment status information.

To access this API Merchant should register first merchant's server IP which will be used to access this API to GOC Pay.

Payment Inquiry			
URL	https://pay.goc.id/inquiry/		
HTTP method	POST		
Content-Type	x-www-form-urlencoded		
Parameters			
Name	Type	Required	Description
merchantId	an	Yes	Merchant ID, provided by GOC. <b>Required:</b> Yes <b>Format:</b> 10 characters
trxId	an	Yes	Merchant transaction ID, a unique value to identify each transaction. <b>Required:</b> Yes <b>Format:</b> max 64 characters
sign	an	Yes	Message hash signature, formula: SHA256(merchantId + trxId + hashKey) (*hashKey will be provided by GOC) <b>Required:</b> Yes <b>Format:</b> 64 characters
Payment Inquiry Response (JSON)			
inquiryStatus	n		Payment Inquiry status: 100 = inquiry success/transaction found 201 = transaction not found 301 = invalid sign <b>Format:</b> numeric, integer
merchantId	an		Merchant ID, provided by GOC. <b>Format:</b> 10 characters
trxId	an		Merchant transaction ID, a unique value to identify each transaction. <b>Format:</b> max 64 characters
channelId	n		Payment channel ID. <b>Format:</b> numeric, see payment channel id list
amount	n		Total transaction amount that should be paid by customer. <b>Format:</b> numeric, integer for currency IDR
currency	a		Transaction currency. <b>Format:</b> ISO 4217 currency code

status	n		Payment status code: 102 = payment request has been successfully received by GOC Pay and waiting for payment by customer. 103 = payment request has been forwarded to payment channel and waiting for payment by customer. 100 = the transaction has been successfully paid by customer. <b>Format:</b> numeric, integer
paidDate	ns		Payment transaction date. <b>Format:</b> yyyy-MM-dd HH:mm:ss with WIB time zone Example: "2017-01-22 13:05:00"
paidAmount	n		Total amount paid by customer. <b>Format:</b> numeric, integer for currency IDR
paidCurrency	a		Currency paid by customer. <b>Format:</b> ISO 4217 currency code
referenceId	an		Unique reference id of this transaction from GOC Pay <b>Format:</b> 32 characters

Payment Inquiry Response data will be formed as string in JSON format:

```
{
  "inquiryStatus" : [ inquiryStatus ],
  "merchantId" : "[ merchantId ]",
  "trxId" : "[ trxId ]",
  "channelId" : [ channelId ],
  "amount" : [ amount ],
  "currency" : "[ currency ]",
  "status" : "[ status ]",
  "paidDate" : "[ paidDate ]",
  "paidAmount" : [ paidAmount ],
  "paidCurrency" : "[ paidCurrency ]",
  "referenceId" : "[ referenceId ]"
}
```

Status:

- 0 = Payment request from merchant has been received by GOC Pay and waiting for payment from Customer.
- 2 = Payment request has been transferred to Payment Channel and waiting for payment from Customer.
- 100 = The transaction has been successfully paid by Customer.
